INTRODUCTION

High Quality spice and food milling is nothing but LOW TEMPERATURE GRINDING!!!

We have overcome the challenge of retaining the volatile oil in spice milling. With our cold milling capability, we can produce powder from any spice and food, to any particle size, retaining the aroma, colour and natural goodness of the raw material, by milling below 20 degrees centigrade, irrespective of the ambient temperature.

Spice exporters including cinnamon exporters have been making a critical request time and again to retain the volatile oil in milling cinnamon, which is a minute value of about 1 – 2 % and to help elevate the traditional cinnamon export of Sri Lanka from the Dutch period to a value added export product. We readily accepted this challenge and have been able to address it successfully. Our huge mill is now the Nation's factory capable of milling spices into any particle sized powder within a few seconds at a temperature of 20°C or less, even if the ambient temperature is as high as 40°C, retaining the natural goodness during production.

ISO 22000: 2018 HACCP

Manufacture and dispatch of rice flour and coconut flour, spice powder, cereal powder (finger millet and orid), dried fruit powder (mango, pineapple, banana, papaya and jack fruit), dried cassava flour, dried jackfruit seed flour and dried brewer's spent grain (BSG) powder

WHITE RICE FLOUR	13

Cassava Flour

- Produced under low temperatures
- Particle size < 140 microns, customizable upon request
- Ideal for modern food industry including bakery

Cinnamon Powder Superfine

- Milled under low temperatures to retain the volatile oil content
- Particle size < 9 micron
- Retain highest volatile oil content depending on the raw material

Cinnamon Powder

Volatile Oil 0.5% - 0.6%

- Milled under low temperatures
- Volatile oil content 0.5% - 0.6%
- For lower grade high volume industrial applications

Cinnamon Powder

Volatile Oil 0.6% - 0.9%

- Milled under low temperatures
- Volatile oil content 0.6% - 0.9%
- For lower grade high volume industrial applications

Cinnamon Powder

Volatile Oil 1% - 2%

- Milled under low temperatures
- Maintaining volatile oil content over 1% upon request of the client

Clove Powder

- Milled under low temperatures
- Fine Clove Powder for industrial and herbal applications
- Available in both organic and natural category
- Retaining highest level of clove oil content

Cocoa Powder

- Milled under low temperatures
- Fine Cocoa Powder
- Ideal for any type of industrial application

Coconut Flour Light Brown

- Off-White version of Coconut Flour
- Milled under low temperatures
- Generally available in 149 microns and 65 microns of particle size, customizable upon request
- Contains around 20% of protein and 60% of dietary fiber

Coconut Flour Super White

- Super White version of Coconut Flour
- Milled under low temperatures
- Generally available in 149 microns and 65 microns of particle size, customizable upon request
- Contains around 20% of protein and 60% of dietary fiber

Disintegrated Coconut Oil Cake Particles

- Disintegrated Coconut Oil Cake Particles in 1000 microns - 1400 microns of particle size customizable upon request

Finger Millet Kurakkan Flour

- Non gelatinized Kurakkan Flour
- Milled into very fine version under low temperatures
- Ideal for any kind of cereal product manufacturing applications including bakery

Finger Millet Gluten Free Pasta

- Incorporated with Rice Flour
- 100% Finger Millet pasta can be produced upon request

Gluten Free Pasta Mix

- Gluten free pasta based on rice and legumes

Jack Seed Powder

- Milled below 130 microns particle size
- Ideal for special food industrial applications

Lemon Grass Powder

- For industrial and herbal applications

Nutmeg Powder

- Fine Nutmeg Powder including shells
- For industrial and herbal applications

Palmyra Root Flour

- Boiled Palmyra Root Flour
- For traditional and modern industrial food applications including cereal and bakery applications

Red Rice Flour

- Non gelatinized Rice Flour
- Milled under low temperatures
- Ideal for traditional food industry and modern bakery industry including cereal based food products

White Rice Flour

- Non gelatinized Rice Flour
- Milled under low temperatures
- Ideal for traditional food industry and modern bakery industry including cereal based food products
